Registry ID	Name	Definition and Registration Status
9544	NSW public schools master dataset	Metadata for IAC0392 covering data table 'NSW public schools master dataset'. Student enrolment numbers are based on the census of government school students undertaken on the first Friday of August. School information, such as addresses and contact details, are updated regularly as required, and are the most current source of information. Data is suppressed for Indigenous and Language Background Other Than English (LBOTE) percentages where student numbers are equal to, or less than five. National Schools Statistics Collection (NSSC) out of scope schools will not have an enrolment figure. NSSC and LBOTE figures are updated annually in December. ICSEA values are updated every April with the previous year's ICSEA values. Student enrolments are generally reported in full-time equivalent units (FTE). The FTE for students studying less than 10 units, the minimum workload, is determined by the formula: $0.1 \times \text{the number of units studied}$ and represented as a proportion of the full-time enrolment of 1.0 FTE. Data relating to healthy canteen is no longer up to date as it is no longer updated by the Department, this data can be sourced through NSW health. • Qualified by NSW Education Statistical Standards Committee on Jan. 16, 2025

Data Element Concepts

Definition: A Data Element Concept defines an idea that could be recorded by data, without specifying how it would be stored or measured. Data Element Concepts are composed of an [Object Class](#), which describes the thing of interest, and a [Property](#) that defines which attribute of the thing would be recorded. Data Element Concepts can be referenced by multiple different Data Elements that each specify the Value Domain used to record the data.
